

## HDL and Atherosclerosis: Is All About Cholesterol?

**Speaker** // **Professor Alberico Catapano** // Faculty of Pharmacy, University of Milano

**Date** // Wednesday, **January 15<sup>th</sup>** // 11:30

**Location** // Sala Polivalent, Centre for Omic Sciences (**COS**), Reus

**Prof. Alberico Catapano** is Full Professor of Pharmacology at the Faculty of Pharmacy at the University of Milano in the Department of Pharmacological Sciences. Prof. Catapano is an active investigator in the biochemical and genetic causes of atherosclerosis, cellular metabolism of lipoproteins, biochemical and molecular defects in atherogenesis, lipid lowering drugs, and clinical trials with anti-atherosclerotic drugs. Prof. Catapano has been co-organizer of a number of international meetings, and scientific secretary of the DALM meetings. Prof. Catapano is the author of more than 200 papers in peer reviewed journals and the editor of 12 books on lipids, lipoprotein metabolism and atherosclerosis and is currently the Editor for the supplements to the journal Atherosclerosis.

In 2013, Prof. Catapano took office as the **President of the European Atherosclerosis Society** (EAS). In addition to his involvement in the EAS, Prof. Catapano is a distinguished Fellow of the International Society of Atherosclerosis and a Professional Member of the American Heart Association. Actively involved in Italy, he is also Director of the SISA Center for the Study of Atherosclerosis in Milan, the President of the Italian Society for Clinical and Experimental Therapeutics and the President of the Lombardy Chapter of the Italian Society for the Study of Atherosclerosis (and member director of the SISA Foundation). He also coordinates the Arteriosclerosis, Thrombosis and Vascular Biology group of the Italian Society of Cardiology.
